### Mistra FinBio Consultation response regarding the revised and simplified Exposure Drafts of the ESRS

In late July 2025 EFRAG published the revised and simplified Exposure Drafts of the European Sustainability Reporting Standards (ESRS). The draft was launched to gather feedback from stakeholders across the EU corporate reporting ecosystem.

This follows the European Commission's Omnibus initiative and its formal request to EFRAG in March 2025 to deliver a critical simplification to the ESRS adopted in 2023. The objective is to make sustainability reporting under the Corporate Sustainability Reporting Directive (CSRD) more manageable while preserving its relevance and alignment with the European Green Deal.

### How accepted is it to trade with companies involved in warfare?

Financial ethics researcher Mattias Gunnemyr participates in Sveriges Radio Ekot.

An investigation by Sveriges Radio Ekot has revealed that Swedish pension funds, specifically the Seventh AP Fund, have invested millions in the Israeli company ICL Group. The company manufactures white phosphorus, a chemical known to cause severe burns and which, according to human rights organizations, has been used by Israel in densely populated areas of Gaza and Lebanon.

The findings raise ethical questions about how accepted it is to trade with companies involved in warfare. Financial ethics researcher Mattias Gunnemyr from the University of Gothenburg and affiliated researcher to Sustainable Finance Lab, highlights the dilemma faced by investors: whether to divest from such companies or attempt to influence them from within.

## SFL presents preliminary results for partner in Copenhagen

Danske Bank, one of the SFL partners, has invited stakeholders to a round table event in October. SFL's Lin Lerpold, Örjan Sjöberg, Sarah Philipson and Catherine Dolt will present preliminary results from a study on how Swedish banks, real estate owners, and construction companies integrate human rights in their investments. The focus is on the exploitation of labour in the real estate and construction industry.

## “The big money bags are in the financial market”

The magazine Fastighetsnytt interviews SFL Director Kent Eriksson, who discusses sustainable financing linked to the real estate sector. He sees a knowledge-intensive real estate sector where the gap between what is done in the industry and what is done at universities has narrowed.

## A systems approach to sustainable finance: Actors, influence mechanisms, and potentially virtuous cycles of sustainability

In a paper in iScience, Beatrice Crona and colleagues apply a systems analysis lens to understand how financial sector structures and actors influence sustainability outcomes, often in counterproductive ways. Key barriers include the lack of science-based metrics, poor integration of environmental risks, and limited capacity to evaluate complex system dynamics.

Current financial practices frequently miss or misinterpret systemic sustainability risks, and the authors identify three critical areas where collaboration between sustainability science and finance is urgently needed:

- translating scientific insights into financial decision contexts
- supporting science-based corporate sustainability reporting
- strengthening environmental impact assessment
